Dear Marcel,

Just a note to clarify what I am sending you enclosed. I recently received a letter from Chris Bird in answer to a letter and the Press Democrat article that I sent him I am enclosing the letter from Chris and my answer to it. Also you will find a copy of the Press Democrat article and a copy of a brochure about a series of lectures that is being held at the U.C. Berkley campus. Randy and Andrea and myself are going and it would be nice to see you there, we hope that you can make it. One of the lecturers is a fellow named Harold Puthoff, Ph.D and he works for SRI doing laser research. He also has received a grant from the "Science Unlimited Foundation" of San Antonio, Texas to prove or disprove the validity of the telepathic response in plants. Bye for now.

Sincerely yours,

Bob Swanson,
